

ARTESYN LGA110D DUAL O/P NON-ISOLATED DCDC

110 Amp DC/DC Converter

Advanced Energy's Artesyn LGA110D power supply features a 7.5 to 14 VDC input voltage range and 350 W output power rating. It is a new design of high performance non-isolated DC-DC converter focused at providing low voltage and high current power conversion in a unit that can be used in multiple different modes and combinations. The unit has a 2-phase design which can be employed separately creating 2 output voltages, or they can be combined to create a single output voltage. Up to 4 modules can be used in such a way resulting in a single output of up to 440 Amps being created from 1 part number. The operational features include remote On/Off, variable output voltage as well as overcurrent protection, over-voltage protection, and over-temperature protection with control functions being provided by either pin-strap resistors or PMBus control for digital communications.

SPECIAL FEATURES

- Improved substrate uniformity
- 2-phase design
- DUAL or SINGLE output configuration possible
- Stacked module array (up to 4 units) with up to 24 combinations of phase configuration
- High efficiency up to 96%
- Small size: 27.5 mm * 12.8 mm * 13.4 mm
- No minimum load requirement
- Wide operating temperature range
- Exceptional power density; 203 A/ sq-inch

- Analogue or Digital control
- IPC9592B compliant (TBD)
- Tape and reel packaging
- Reflow compatible
- Possible to stack up to 4 for 440 A
- I-mon and T-mon supported
- Block-pin termination
- Automatic loop compensation

SAFETY

Designed to meet EN62368

WARRANTY

2 years (Consult factory for extended terms)

AT A GLANCE

Total Current

110 A single-mode 55 A dual-mode

Input Voltage

7.5 to 14 VDC

Variable Output

0.5 to 5 VDC

PATENT

Pending www.artesyn.com/ep-patents

TECHNICAL DATA

Electrical Specifications						
Input						
Input voltage range		7.5 VDC to 14 VDC (0.5 V ≤ Vo ≤ 3.3 V) 10 VDC to 14 VDC (3.3 V < Vo ≤ 5.0 V)				
Max input current	40 A	40 A				
Input capacitor (internal)	140 uF (10 uF*14 pcs)	140 uF (10 uF*14 pcs)				
Input capacitor (external) recommended	88 uF (22 uF*4 pcs)1	88 uF (22 uF*4 pcs) ¹				
Output ²						
Independent output 1 and 2						
 - 0.5 V to 1 V - 1.8 V - 2.5 V - 3.3 V - 5.0 V 	55 A 50 A 45 A 40 A 35 A					
Combined output 1 and 2						
- 0.5 V to 1 V - 1.8 V - 2.5 V - 3.3 V - 5.0 V	110 A 100 A 90 A 80 A 70 A					
Efficiency @ Vin=12 V, Freq=533 KHz & Ta=25°C	Nom

Advanced Energy (AE) has devoted more than three decades to perfecting power for its global customers. AE designs and manufactures highly engineered, precision power conversion, measurement and control solutions for mission-critical applications and processes.

Our products enable customer innovation in complex applications for a wide range of industries including semiconductor equipment, industrial, manufacturing, telecommunications, data center computing, and medical. With deep applications know-how and responsive service and support across the globe, we build collaborative partnerships to meet rapid technological developments, propel growth for our customers, and innovate the future of power.
