

**ARTESYN EMBEDDED TECHNOLOGIES**  
**RESTRICTION OF HAZARDOUS SUBSTANCES (RoHS)**  
2018 POSITION STATEMENT

Artesyn Embedded Technologies keeps RoHS compliant products current by periodically monitoring changes and developments related to the EU RoHS Directive (2011/65/EC). We are aware that an amendment to this directive was published as **Directive 2015/863** last March 31, 2015. This directive referred to as ROHS 3 restricts the use of four additional substances as below:

- Bis(2-ethylhexyl)phthalat (DEHP) (0,1 %)
- Butylbenzylphthalat (BBP) (0,1 %)
- Dibutylphthalat (DBP) (0,1 %)
- Diisobutylphthalat (DIBP) (0,1 %)

The new Directive will come into force by July 22, 2019. **Artesyn Embedded Technologies** has set up internal working groups which are in the process of assessing the application of these Directives to its business and products and devising mechanisms to ensure that **Artesyn Embedded Technologies** and the products which it sells will comply with their provisions. We have an internal deadline to be fully compliant to the ROHS 3 directive by April 22, 2019.

Product Certificates of Conformance (COCs) may be requested by contacting [environmental.initiatives@artesyn.com](mailto:environmental.initiatives@artesyn.com).
